

Mr. Last and the Cheyenne Lion's Club,

We made it back from our trip to Colombia, South America last week. It was a huge success. Our little group of twelve students and two doctors examined and provided glasses to 1013 people in four days. The Cheyenne Lion's Club's donation was a huge contribution to our efforts. We actually stayed with members of the Barranquilla (the town in Colombia we were in) Lion's Club. They made the arrangements for our clinic location, and got the word out that we were coming "to serve." I've attached a few pictures to share during your next meeting, if you'd like: 137 is our entire group with the members of the Barranquilla Lion's Club (or Club De Leones!). 043 is a photo of me with an 18 y/o girl with epilepsy. She was a 5.00D myope, and this was the first time she's ever worn glasses. Just to give you an idea, that means she could only see clearly about 8 inches in front of her face before we gave her the glasses. This was the first time she could physically see what was around her. You can see the big smile on her face. The others are pictures of our little clinic, our "waiting room," and some of our members working. Thank you again for all of support and effort in collecting the glasses. It was a wonderful experience, not to mention great practice, and we helped over one thousand people see better. Again, thank you.
